

Jeevan Kumar Rayamajhi

works.rayamajhijeevan03@gmail.com | linkedin.com/in/jeevanrayamajhi | github.com/LyfJKR

Summary

Business Information Management student with strong skills in data cleaning, SQL, Excel, and visualization. Experienced in building interactive dashboards with Power BI and Tableau, and conducting exploratory data analysis in Python to uncover trends and ensure data quality. Proven ability to translate complex datasets into actionable insights through reports and visualizations. Seeking to support data-driven decision-making as a Data Analyst Intern.

Education

Shanker Dev Campus

Aug 2022 - Apr 2026

Bachelor, Information Management (BIM) (GPA: 3.75)

Kathmandu

- **Coursework:** Business Intelligence, Business Statistics, Database Management System, Programming with Python, Business Research Method, Artificial Intelligence

Projects

Pizza Sales Analytics | github.com/LyfJKR/Pizza_Sales_Analytics

- Analyzed 10,000+ sales transactions using SQL and exploratory data analysis to identify key sales drivers and seasonal trends
- Developed five interactive Power BI dashboards with KPI cards, trend charts, and slicer filters to support real-time performance monitoring
- Identified top 4 categories contributing 35-40% of revenue; discovered seasonal patterns.
- Cleaned and validated data by addressing 8-12% nulls and duplicates, standardizing data types, and documenting data definitions for consistency
- Outcome: Enabled real-time revenue tracking; identified inventory optimization opportunities

Customer Segmentation Analysis | github.com/LyfJKR/Customer-Behavior-Analysis

- Segmented 5,000+ customers using RFM analysis (Recency, Frequency, Monetary) into 5 groups
- Applied Pareto analysis: Top 20% customers generated 60% of total revenue; high-value segment worth 3-4x more
- Calculated key metrics: Customer Lifetime Value (CLV), retention rate (70% for repeat buyers within 60 days).
- Built Power BI reports showing segment distribution, CLV comparison, and retention patterns.
- Outcome: Recommended tiered loyalty program; predicted 15-20% improvement in retention

Data Analytics Job Simulation

Deloitte Australia (via Forage)

- Executed forensic data analysis techniques to uncover anomalies and support audit-focused insights
- Created a data dashboard using Tableau
- Leveraged Excel for data classification and summary statistics, then translated findings into actionable business recommendations

Data Visualization & Insight Simulation | github.com/LyfJKR/TATA-s-Data-Visualization

Tata Consultancy Services (via Forage)

- Completed a simulation involving creating data visualizations for Tata Consultancy Services
- Prepared questions for a meeting with client senior leadership
- Created visuals for data analysis to help executives with effective decision making
- Outcome: Transform business through customer centric strategy.

Skills

- **Technical Skills:** Data Cleaning & Preparation, Data Analysis & Reporting, MS Excel, SQL, Python, Data Visualization, EDA, Prompt Engineering & Generative AI, AI-Assisted Data Analysis
- **Soft Skills:** Analytical Thinking, Communication, Attention to Detail, AI Adaptability, Problem Solving, Presentation, Time Management, Data Storytelling, Business Acumen
